Work experience

iSoftBet   November 2016 — Present
Php Developer

Netex Consulting   October 2015 — November 2016
Php Developer

Responsibilities (backend/frontend):
- maintenance for online shopping site (tirendo.de available in more then 20 countries)
- develop new functionalities, bug fixing

Technologies which we used:
- versioning and revision control system: GIT
- Vagrant to create and configure virtual development environment
- PHP Framework: Zend - Propel ORM - Memcached, Redis (caching data and objects in RAM. For example we store text descriptions of products to reduce the number of times an external data source such as a database or API must be read)
- Jenkins to schedule a build to run anytime you want for example to run a Memcached import from database

Life Is Hard   August 2014 — October 2015
Php Developer

Responsibilities (backend/frontend):
- maintenance for project in CodeIgniter Framework
- improvements, bug fixing, develop new functionalities on 24Broker (24broker.ro)

- working on products not on outsourcing projects

Technologies which we used:
- versioning and revision control system: SVN
- PHP Framework: CodeIgniter
- database management system: MySql
- Html, Css
- JQuery, Ajax
I worked on a team of 16 players, we used JIRA for project management.

Education

Information Technology	September 2010 — July 2014
National College of Avram Iancu Campeni
